

## X5 Update 7 – Summary of Fixes

<b>Heading</b>	<b>Issue in current version</b>	<b>Fix in Update 7</b>
<b>My Tasks</b>	When selecting a costing from a list of multiple costings on your workflow task list it is always the first costing on the list that was highlighted in the approval screen, regardless of the one selected.	When selecting a costing to approve from your tasks the correct one is now highlighted on the approval screen.
<b>Salary Calculator</b>	Salary calculator does not project increments correctly.	The starting scale point and subsequent salary increments are now calculated in the same way as the X5 costing screens.
<b>Currency Rates</b>	Updated rate not appearing on Project Set up screen and reports.	Updated rate appears on Project Set up screen and reports without having to apply the work around.
<b>NaN issue</b>	When changing the post duration for a DI staff you may encounter a NaN value in the FAC and price field which prevents you from saving the changes made.	This has now been fixed and the "NaN" value is no longer shown.
<b>Non-Staff costs</b>	Total yearly costs do not change when fixed price and inflation is toggled.	The Total cost yearly figures are now showing correctly on the Non-staff tab on the Costing screen.
<b>Costing duration or scheme amendments</b>	When trying to amend costing duration or the scheme you may encounter a system time out error.	The Change proposed dates and Change scheme processes have been moved to a server process and are no longer run online by the user for it to timeout. This means that a log file is available from the process in Ordered reports and that the timeout no longer occurs.
<b>Advanced Search</b>	Advanced search doesn't work when the 'Hide option' is selected on the user profile screen.	Advanced search works as expected even when the 'Hide option' is selected on the user profile screen.
